Reporting directly to the Manager, Technical Services, the Superintendent, Technical Services, is responsible for overseeing activities related to supporting the operations and to ensure engineering and operating standards are met. The Technical Services Superintendent will be accountable for the delivery of all technical services for the mine and will develop and maintain optimal short and long term business plans. He/she will manage the day-to-day activities by optimizing productivity in accordance with goals and scheduling while demonstrating a strong personal commitment to safety and the environment.

Main Responsibilities

- Provide leadership for the safe and sustainable development of the mining operations
- Work with senior managers, other superintendents, engineers, technologists and technicians to provide engineering services and support
- Ensure that operations comply with all health and safety requirements
- Supervise and mentor staff responsible for short and long term mine planning, geological control, and all technical services related to the operation
- Responsible for the achievement of the production and profitability objectives
- Ensure the timely delivery of detailed layouts, plans and schedules
- Lead activities and resources to compile accurate mine budgets and forecasts
- Accountable for having mine systems and infrastructure properly designed, installed, and maintained. These include but not limited to mine development, blast design, ventilation, dewatering and backfill plans
- Ensure that ground control management plan is in place and being adhered to
- Assess the feasibility and the potential for commercial benefits of new sites
- Monitor and evaluate mine performance
- Manage underground construction projects
- Plan, execute and manage underground diamond drill programs.
- Overlook all work related to mine ventilation and upgrades to the underground dewatering systems.
- Review and ensure proper implementation of Ground Control Management plans, as applicable

- Prepare and review weekly and month-end operational reports for the mine.
- Work on projects such as production and development drifts, long holes stopes and mining areas, the closure of old mine workings/areas, and site restoration
- Prepare and negotiate budgets and monitor spending
- Prepare technical reports and briefs on equipment, safety, project progress and other matters
- Oversee the development of engineers, technologists and technicians, providing support, encouragement, advice and guidance

Skills and Abilities Required

- Strong problem solving and analytical skills
- Demonstrated commitment to workplace safety and regulatory compliance
- Excellent leadership, communication, and decision-making abilities
- The ability to be a team player and to work within a rapidly changing work environment
- Manage stress and tight deadlines and have a good ability to adapt to change
- Experience managing a team of Engineers
- Valid BC Driver's Licence

Qualifications

- University degree in Mining Engineering
- Be a member of the Professional Engineers and Geoscientists of BC
- 10 or more years of experience in underground operations
- Exposure to open pit operations will be considered as an asset
- Sound understanding of planning, ventilation, rock mechanics, ground control, underground construction, pumping, material handling, drill and blast
- Previous supervisory or management level experience
- Excellent technical knowledge

Benefits

- Paid time off
- Extended Health, Dental, Vision Care
- Disability Insurance
- Life Insurance
- Employee Share Purchase Plan
